

The 35m

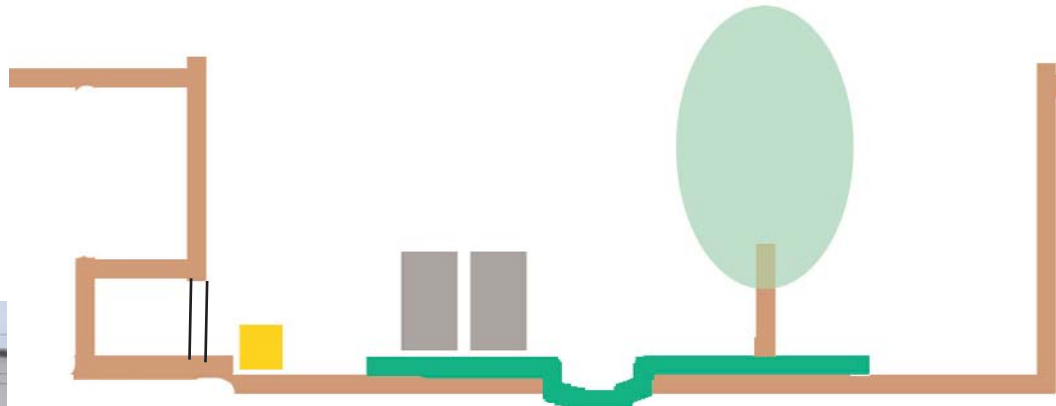

STREET

Vaubanallee, Vauban, Freiburg DE

The new district of Vauban has a comfortingly simple and legible street pattern. From the main road (which is an arterial route leading from Freiburg) one single main road, Vaubanallee provides the main artery through the development. It is 35m wide.

On each side much smaller streets, none of which extend more than a few hundred metres, are interspersed with strips of landscaped and play areas. Major buildings front Vaubanallee or as in the case of the primary school, they appear as the terminals to side streets. Rather surprisingly the commercial side is the north side.

Most of the houses and flats enjoy East/West aspect.

5m	6m	7m	3m	8m	6m
----	----	----	----	----	----

Commercial pedestrian pavement
Intermittently under-cover, faced by wall and window zone.

Vehicle zone
Two way with short term parking against pavement.
